

Open Lecture Day Lund 2 December 2014

Architecture: enduring, ephemeral, moving, dust

Temporality has become a major subject lately in philosophy, in the social sciences as well as in urban and architectural research. Architecture and society must be seen as deeply intertwined and mutually evolving in time. The trend does not have a simple origin but have materialized from theory as well as practice during the early 2000s: from publications like the translation of Lefebvre's *Rhythmanalysis* into English, to political decisions like the legislation of Urban time plans in Italy through the so called Turco act, as well as in architectural practice and the increasing number of temporary use projects.

In connection to the ResArc course *Temporalities (Tendencies in Architectural and Urban Research)* we invite all interested to a day of three open lectures by prominent scholars in this field, Albena Yaneva, Andrea Mubi Brighenti and Teresa Stoppani, all of whom have dealt with time and temporalities as issues connected to social and architectural theory.

The event is open to all interested and free of charge, however we need a statement of interest beforehand: in order to **register your participation, please send an email at latest 15 November to resarc@arkitektur.lth.se**

Venue: *Lund 2 dec, School of Architecture / LTH / LU, A-huset, Fullskalelabbet*

Program

11.00 – 12.30 *Albena Yaneva, professor, University of Manchester*
Slowing Down: Temporality in Building Renovation and The Escape from Perspective

Lunch break

14.00 – 15.30 *Andrea Mubi Brighenti, aggregate professor, University of Trento*
Logistic time and evental time: Envisaging possible applications to urban and architectural research

Coffee break

16.00 – 17.30 *Teresa Stoppani, professor, Leeds Beckett University*
Erasure: material and critical
